

CORE RECOVERY GROWTH FACTOR TOPICAL APPLICATION AFTERCARE AND CONSENT FORM

Procedural Description

The Core Recovery Growth Factor Topical Application uses Omni Bioceutical's Clinical Core Recovery Complex, an advanced serum with over 99% growth factor concentration, crafted through a patented HPL (Human Protein Lysate) process. This highly potent formula contains targeted growth factors and cytokines designed to reduce inflammation, soothe irritation, and hydrate the skin following intensive treatments. With its unique ability to support collagen and elastin production, this application enhances the skin's resilience, helping to promote optimal recovery and achieve a more radiant, youthful complexion.

Applied immediately after treatments such as lasers, microneedling, or chemical peels, Core Recovery Growth Factor creates an ideal post-treatment environment for healing and rejuvenation. This topical enhancement minimizes downtime, providing calming relief while supporting skin regeneration and long-term health.

Before Your Core Recovery Growth Factor Treatment

- **Avoid Exfoliating Products:** Refrain from using retinol, AHAs, BHAs (e.g., salicylic acid), and benzoyl peroxide for 3 days prior.
- **Limit Sun Exposure:** Avoid prolonged sun exposure or tanning products, as sun-damaged skin may respond more sensitively to treatment.
- **Inform Your Provider:** Notify your provider of any recent procedures or skin sensitivities to ensure safe application.

What to Expect During the Treatment

After your procedure, a trained provider will cleanse your skin and apply the Core Recovery Growth Factor serum, which is designed to calm and support the natural healing process. Most clients report a cooling, soothing sensation upon application. The process is quick, lasting about 5 minutes, and is typically well-tolerated without discomfort or need for numbing.

Post-Treatment Instructions

- **Sun Protection:** Apply sunscreen with SPF 30 or higher to the treated area, reapplying daily to protect the skin as it heals.
- **Cold Compresses:** Use cold compresses if you experience mild redness or swelling, which should subside within a few hours.
- **Avoid Heat and Exercise:** Refrain from saunas, steam rooms, hot showers, and strenuous exercise for 24 hours to reduce irritation.
- **Hydration:** Keep the skin moisturized with gentle, hydrating products recommended by your provider to aid in recovery.

Contraindications

This treatment may not be suitable for individuals with active cancer or a history of certain cancers, as growth factor-based products could potentially influence cellular activity. If you have a current or past cancer diagnosis, please consult with your healthcare provider or oncologist before undergoing this treatment. By signing this consent form, you confirm that you have disclosed any relevant medical history to Honey Skincare Studio.

Potential Side Effects and Risks

While the Core Recovery Growth Factor Topical Application is generally safe and well-tolerated, some clients may experience mild, temporary effects, including:

- **Redness and Swelling:** Common at the application site and typically subsides within a few hours to a day.
- **Mild Discomfort or Tingling:** A tingling sensation upon application may occur and generally resolves quickly.
- **Rare Risk of Infection:** Minimal risk exists if the skin barrier is compromised. If blisters or crusting develop, avoid touching the area and contact Honey Skincare Studio for guidance.
- **Pigment Changes:** Rarely, treated areas may appear darker as they heal. Consistent sun protection is essential to minimize this risk.

Consent to Clinical Photography

To document progress and ensure comprehensive records, photographs may be taken before and after your treatment. These images are confidential and will be used solely for clinical documentation and treatment evaluation. They will not be used for marketing or educational purposes without your explicit, separate consent.

Acknowledgement of Treatment Goals and Risks

I understand that the Core Recovery Growth Factor Topical Application is designed to support post-treatment healing, though it may not completely prevent all post-procedure symptoms. I have been informed of potential risks and side effects associated with this treatment and understand that while adverse reactions are unlikely, they may occur. Multiple applications may be recommended for optimal results based on individual skin needs and recovery goals.

For Women of Childbearing Age

By signing below, I confirm that I am not pregnant and do not plan to become pregnant during the treatment period. I will inform Honey Skincare Studio if my pregnancy status changes.

CONSENT CONFIRMATION

By signing below, I confirm that I have read and fully understand the information provided in this consent form for the Core Recovery Growth Factor Topical Application. I acknowledge the potential risks, benefits, and post-care requirements, and I agree to follow the recommended aftercare instructions to optimize treatment results and minimize any risks. I have had the opportunity to ask questions, and all of my questions have been answered to my satisfaction.
