

IONCLEANSE DETOX FOOT BATH CONSENT FORM

General Information

The IonCleanse Detox Foot Bath is a non-invasive detoxification therapy that uses biocompatible electrical frequencies to create an ionic field within the water. These ions interact with the body through osmosis, drawing out and neutralizing toxins such as heavy metals, glyphosate, and other environmental pollutants. This therapy supports overall wellness and is particularly beneficial for individuals struggling with detoxification, lymphatic stagnation, or toxin-related health concerns.

How It Works

The IonCleanse process works by splitting water molecules into negatively charged hydroxide ions (OH-) and positively charged hydrogen ions (H+). These ions attract and neutralize oppositely charged toxins in the body, allowing for their removal through the feet during the session. The ionic field supports detoxification while promoting a relaxed and balanced state.

Indications

This therapy may be recommended for:

- Individuals exposed to heavy metals, pesticides, or environmental toxins.
- Those seeking to improve lymphatic circulation or enhance the body's natural detox pathways.
- Clients looking to support overall health, energy levels, and a sense of well-being.

Side Effects

Common side effects may include:

- Mild redness or tingling in the feet during or after the session.
- Temporary fatigue or lightheadedness as the body adjusts post-detox.
- Mild detox reactions, such as changes in bowel habits or increased urination.

While rare, other potential side effects could include:

- Skin irritation or discomfort at the contact points.
- Mild flu-like symptoms as the body eliminates toxins.

Contraindications

This therapy should not be administered to individuals who:

- Have a pacemaker or other implanted electrical devices, as the ionic field may interfere with their function.
- Are pregnant or breastfeeding, as the mobilization of toxins could pose risks.
- Have organ transplants or are on medication critical for life support (e.g., anti-seizure drugs) without prior medical consultation.

Interactions

The IonCleanse detox foot bath may interact with:

- Certain medications affecting electrolyte balance or fluid retention.
- Blood sugar levels in diabetic individuals; consultation with a healthcare provider is advised before treatment.

WRITTEN CONSENT

By signing below, I confirm that I have read and understand the information provided regarding the IonCleanse Detox Foot Bath. I acknowledge the potential risks, side effects, and benefits of this therapy. I consent to proceed, understanding that results may vary and that no outcome is guaranteed.

- **If I experience any unexpected problems or adverse reactions, I will contact Honey Skincare Studio immediately at (703) 589-9665.**

Liability Release: By signing below, I acknowledge that I have read and agree to the foregoing informed consent. I consent to this and all future IonCleanse sessions under these terms. I release the provider, administering staff, and facility from liability associated with this procedure.
