

REJURAN – SALMON DNA – TOPICAL APPLICATION AFTERCARE AND CONSENT FORM

Procedural Description

The **Rejuran Topical Application** is a bio-stimulating skin treatment that utilizes **polynucleotides (PN)**, which are DNA fragments extracted from salmon. These polynucleotides are bio-compatible with human tissue, meaning they integrate safely into the skin, supporting natural regeneration processes without adverse reactions. Known for its regenerative properties, Rejuran's active ingredient has been widely used in both aesthetic and medical settings, particularly for enhancing skin healing, aiding in skin graft integration, and accelerating tissue repair.

When applied topically, Rejuran is especially beneficial following skin resurfacing treatments such as microneedling or laser therapy. The micro-channels created during these treatments allow Rejuran's polynucleotides to penetrate more deeply into the skin, where they promote collagen production, enhance elasticity, and improve skin texture. This application can help reduce inflammation, accelerate skin repair, and support a smoother, more hydrated complexion.

Benefits of Rejuran Topical Application

- **Skin Regeneration:** Rejuran supports cell turnover and skin repair, enhancing texture and resilience.
- **Bio-Stimulation:** Acts as a bio-stimulator by promoting collagen production, which helps firm and strengthen the skin.
- **Increased Hydration:** Assists in moisture retention, contributing to a hydrated, smooth, and refreshed appearance.
- **Healing and Repair:** Commonly used in medical settings for wound healing and skin graft support, aiding in recovery and tissue integration.
- **Reduction in Redness and Irritation:** Soothes post-treatment inflammation and calms the skin, reducing redness and irritation.

Treatment Areas

- **Face:** Enhances skin texture, reduces fine lines, and promotes hydration.
- **Neck:** Improves skin firmness and elasticity.
- **Décolletage:** Rejuvenates the chest area by reducing fine lines and improving smoothness.

Pre-Treatment Instructions

- **Avoid Skin Irritants:** Discontinue retinoids, exfoliants, and other potentially irritating products 3-5 days before treatment.
- **Limit Sun Exposure:** Avoid prolonged sun exposure and tanning for 1-2 weeks prior to your appointment.
- **Cold Sore Precaution:** Inform your provider if you have a history of cold sores, as the treatment may trigger an outbreak.
- **Arrive with Clean Skin:** Please arrive with no makeup on the treatment area to ensure a sterile environment.

Post-Treatment Instructions

- **Sun Protection:** Use SPF 40+ sunscreen daily and avoid direct sunlight for at least 7-10 days to minimize pigmentation risks.

- **Limit Sun Exposure:** Avoid prolonged sun exposure and tanning for 1-2 weeks prior to your appointment.
- **Cold Sore Precaution:** Inform your provider if you have a history of cold sores, as the treatment may trigger an outbreak.
- **Arrive with Clean Skin:** Please arrive with no makeup on the treatment area to ensure a sterile environment.

Potential Risks and Side Effects

While Rejuran is generally safe, potential risks and side effects include:

- **Mild Redness and Irritation:** Some redness or tingling may occur temporarily following the procedure.
- **Dryness and Flaking:** Temporary dryness or flaking as the skin heals; moisturizing can help alleviate this.
- **Pigmentation Changes:** Rarely, temporary hyperpigmentation or hypopigmentation may occur, particularly if the skin is exposed to sunlight.
- **Allergic Reactions:** Although rare, reactions may include itching, redness, or localized swelling.
- **Infection:** Although unlikely, infection is a risk with any post-procedure application; signs include increased redness, fever, or pus. Contact Honey Skincare Studio at 703-589-9665 if these symptoms arise.

Contraindications

The Rejuran Topical Application may not be suitable for individuals who:

- **Have a known allergy to salmon DNA or polynucleotides.**
- **Are pregnant or breastfeeding.**
- **Have active skin infections or open wounds in the treatment area.**

Consent to Clinical Photography

I understand that clinical photographs may be taken before and after my procedure for documentation, treatment planning, and monitoring of progress. These images are confidential and will be securely stored as part of my medical record. They will not be used for marketing or educational purposes without my explicit, separate consent.

CONSENT CONFIRMATION

By signing below, I confirm that I have read and fully understand the information provided in this consent form for the **Rejuran – Salmon DNA Topical Application**. I acknowledge the potential risks, benefits, and aftercare requirements, and I agree to follow all recommended instructions. I confirm that I have had the opportunity to ask questions, and all my questions have been answered to my satisfaction. I consent to the administration of the Rejuran Topical Application by the trained professionals at Honey Skincare Studio.
